Lecture 17

Cornell Notes	Topic: Html Images	Course
		Class
		Date

Essential Question:

- How can we incorporate images in html pages?

Questions/Cues:

- Image tag

Notes

- Image tag is a self closing element
- <img src= "akshat.png">
- You can use a file and a url in the tag
- The alt tag is used to give more information about the image and also helps with indexing the website on search engines

Additional information:

- https://developer.mozilla.org/en-US/docs/Web/HTML/Element/img

Summary

- You can use image tag to add images to an html file
