Lecture 18

Cornell Notes	Topic: Html links and anchor tags	Course
		Class
		Date

Essential Question:

- How can we link to other pages and documents in html?

Questions/Cues:

- HyperText

Notes

- HyperText is a bunch of text documents that can be linked together using hyperlinks
- Anchor tag <a> can be used to link to other pages in html
- href is the url that the hyperlink points to
- href is set to equal to the link that we want to point to
- Not a self closing tag
- Can also be used to navigate within the website
